

ARB Sprint Canopy SC25

ARB SPRINT

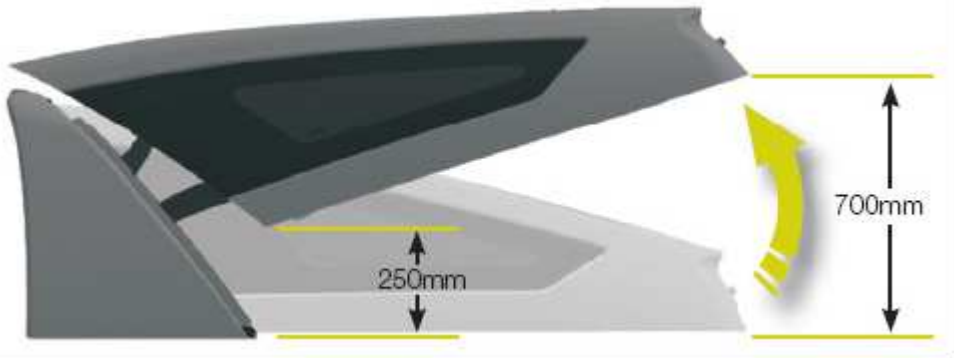

After three years of extensive design and engineering, ARB is pleased to announce the arrival of an exciting new canopy range for Australian ute owners – the ARB Sprint. An innovative new product, SPRINT exudes style and incorporates practical features to enhance the customer experience. Based on recent trends in Australia and Europe the Sprint canopy is aimed at a niche customer segment and will complement the existing ARB canopy product lines.

With the initial launch covering the popular Toyota Hilux dual cab SR5 and more models to be released in coming months, the ARB Sprint canopy is the ideal solution for owners looking to transform their ordinary ute into a sleek and stylish vehicle which will turn heads in the bush or in the urban streetscape. The ARB design team engineered the Sprint canopy from a blank canvas, utilising the latest CAD programs and European trends to ensure the Sprint canopy looks outstanding and complements the original vehicle shape. The Sprint canopy offers plenty of secure storage capacity and is suitable for tools, portable fridges, snow equipment, valuables and the high side opening provides fantastic side access to the ute tub.

The SPRINT canopy represents the latest in technology with a twin skin construction to enable the painted outer layer to blend in with the vehicle and features an attractive, textured black interior to reduce glare while also making it easy to keep and conceal the fasteners and wiring loom. Manufactured from recyclable ABS for structural strength and reduced landfill, the Sprint canopy's weatherproof design incorporates a factory fitted ventilation system to reduce dust ingress and condensation build-up.

The ARB Sprint comes in two distinct parts, with the slimline front being permanently fitted to your vehicle and the lift up large rear section of the canopy which can be easily removed to accommodate transportation of larger cargo if the need arises. Ingeniously, the unique 4 link hinge system lifts up the rear section with minimal assistance to provide excellent access to the back of the vehicle. The maintenance free hinge system and gas struts aid in opening the lid and are located above the wheel arch for unobtrusive access to the main tub storage.

Feature packed, the Sprint includes a bright LED 3rd brake light and an impressive white LED interior light automatically activates when the canopy is opened – keeping your hands free to load or unload cargo. With a low power consumption of 2.5W, the interior light is connected to a three way switch mounted in the vehicle cabin so you can activate the light from the vehicle if you want. An integrated grab handle provides for natural grip from either your left or right hand to assist in closing the canopy. The Fully lockable rear section uses a double sided key to save fumbling around, and an internal safety release mechanism is provided.

Adding to the exceptional look of the canopy, each Sprint canopy is painted to the manufacturers colour code in quality automotive paint. Tough steel mounting brackets provide strength, stability and long lasting resilience in the harshest terrain and the rear section features tinted and fixed safety glass to reduce heat and improve security.

Backed by a 3 year, 60,000km warranty, the ARB Sprint canopy is supported by local spare parts and after sales support.
